

Telecom Infra Project: Project Group Charter

Date of Approval by TIP Board of Directors: [To be inserted by TIP]

This Project Group Charter establishes the scope, intellectual property and copyright terms used to develop the materials identified in this Project Group. Only Participants that execute this Working Group Charter will be bound by its terms and be permitted to participate in this Project Group, and shall be considered “Contributors” in the Project Group as defined in the Telecom Infra Project IPR Policy document.

1. Project Group Name. ***Media-Friendly WG***
2. Purpose. ***Enable Business Models and technical solutions for the value chain accelerating market deployments***

Project Group Scope. The Media-Friendly Solutions Working Group will deliver recipes for services/applications in the radio access network leveraging Mobile Edge Computing’s open architecture, libraries, software stacks and APIs into an OCP platform. The Working Group will provide composites of services and deliver application venues, reduction in backhaul, service aware and ease of use methodologies turning the RAN into an open media and service hub.

The scope includes 5G & IOT service deployments, enhancing the user quality of experience, and providing new revenue generation models. Several different revenue generation models will be implemented giving each participant in the value chain the opportunity for a successful business strategy.

3. Project Group Deliverables. **ToC(s), Draft(s), Publications. Timelines: TBD (working group needs to agree)**
4. Patent Licensing. The patent license for all Contributions, Draft Specifications and Final Specifications within this Project Group shall be: ***[Check one box]***
 - RAND License Option, as set forth in Section 5.2.1 of the Telecom Infra Project IPR Policy.
